

# VELOCITY CellCast

## A NEW APPROACH TO BUSINESS CONTINUITY

### Isn't it time for a more reliable backup plan?

Microspace's Network Operations Center provides enterprise-quality monitoring, control and reporting 24/7/365.

As more and more businesses rely on the cloud for transactions, business critical services, and customer interactions, the network becomes increasingly important. Network outages become business critical and costly.

Wireless network failover has emerged as a leading technology to help cost-effectively minimize the effect of network outages.

VELOCITY: CellCast provides enterprise class hardware and the most reliable 24/7/365 service available. While quality hardware is important, it's the managed service that sets Microspace apart. Our advanced monitoring, control and reporting provide real benefits across any enterprise network. 24/7 visibility of your network means that connectivity or hardware issues are immediately identified and resolved from Microspace's award winning Network Operations Center.

VELOCITY: CellCast provides strong, national, 4G/LTE coverage and utilizes true enterprise grade equipment bundled into a reasonable per location monthly cost.

### Pricing Options

- Cradlepoint 4G LTE Wireless Enterprise Router
- 250MB, 1GB and 5GB Monthly Pooled Data Plans
- Microspace Network Control-Monitoring, Reporting and Support
- 2 and 3-Year Agreements Available
